# 18V LXT BL Cordless Cleaner

## Capsule type

Dust capacity **730 mL**

## Improved dust-resistance

When capsule is installed securely, two ribs inside capsule press the inside frame of filter to hold the filter tight.

photo: DCL283F

### DCL283F

Trigger switch

### DCL284F

One-touch push button switch

**HEPA filter**

## Integrated cyclone unit

Dust capacity **250 mL**

## Integrated Cyclone unit

The filter is less clogged due to separation of fine dust through a cyclone air flow, reducing the decrease in vacuum power of cleaner.

### DCL286F

One-touch push button switch

**Easy filter setting**  
Filter can be fixed with a single push.

## High suction power and Low noise level

- Achieved by redesigning the exhaust air flow path of the motor to reduce wind noise.
- Equipped with high-speed BL motor to ensure high suction power.

### Low noise

DCL283F

**63 dB(A)**

DCL284F **65** <sup>[Mode 4]</sup> dB(A)

DCL286F **66** <sup>[Mode 4]</sup> dB(A)

## Redesigned Floor/ Carpet T-nozzle

- Redesigned structure reduces the resistance caused by suction, providing smooth running.
- Redesigned inside air flow path reduces the noise made inside the nozzle.

## Trigger switch + Sliding lock-on switch

(DCL283F only)

allows for long continuous cleaning with less fatigue.

By moving ① sliding lock-on switch to ON position, ② interlocking trigger switch can be locked on for continuous cleaning.

## 4-suction power mode selection with mode memory function

(DCL284F / DCL286F only)

- The cleaner can memorize a previous power mode and resume vacuuming at the same mode as last time user turned off for user convenience.
- Power mode can be selected before the cleaner is turned on.

## Single LED job light

also functions as a battery capacity warning lamp.

## Pipe locking mechanism

Pipe is fixed with the locking mechanism to prevent it from accidentally coming off.

## Pipe with beveled end

Cleaning of tight places can be done without nozzle by using the beveled end of pipe as a nozzle.
